

## Fact Sheet

- Sync.com Inc.
- Founded: October 2011
- Location: Toronto, Ontario, Canada
- Privately held

Sync began with a simple idea: Everyone should be able to enjoy cloud storage without giving up their privacy. We built Sync for us.

We ourselves wanted a convenient way to store and share our important files. Trouble was, that meant giving third-party service providers full access to our data. Easy-to-use cloud services were insecure; Secure options were complex and impossible to use.

We thought there was a better way.

We built Sync so we could enjoy the simplicity and convenience of the cloud. It's designed for everyone - organizations and individuals with valuable files.

## Work from Anywhere

- Everything in your Sync folder is encrypted and kept safe.
- Keep track of revisions. Recover previous versions of your files that you or your team are working on.
- Available everywhere you are. Access your data from Windows, Mac, web and mobile.

## Secure Sharing

- Shared folders let you allow access to a team of people for instant and easy collaboration.
- Send a secure link to any file or folder for anyone to access

## Private and Safe

- Our unique "zero knowledge" storage environment ensures that only you have access to your data.
- Files are encrypted before they leave your computer using a key we can never see.
